

Oppose HR 4026

Its my chose to have satalite radio and pay for it. to have the NAB try to prevent XM from offering traffic and weather information and other valuable services to listeners like me is unfair. They should be ashamed of themselves for even trying to make such a block. In my humble opinion they are afraid of having compitition that will be better then them and are stooping to low levels to prevent listeners preferance so they dont lose. Makes me want to listen and continue to use my satalite Radio even more.
